Note Note Note

Hyegi Bang
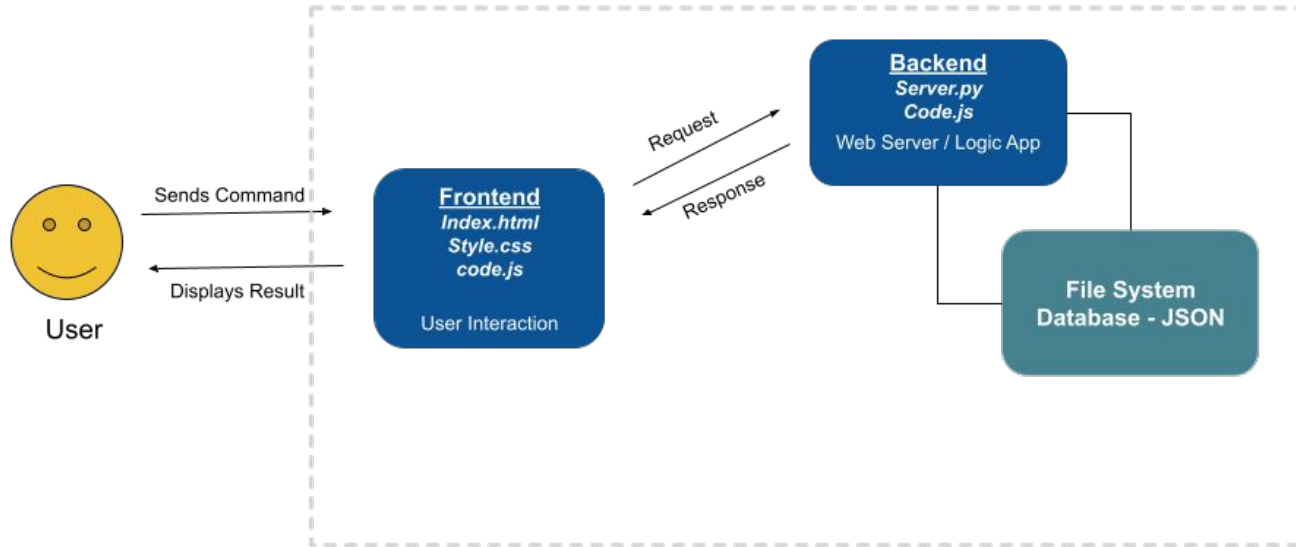

Note Note Note

- Note Note Note is a web-based note-taking application
- Self-hosted with integration of JSON file
- Displays/edits plain text and markdown files
- Import / export files

Architecture of the application

Challenges

- Front-end styling - fitting to size.
- Safari vs. Chrome

Demo

Takeaways

- The process of making design decisions
  - In adding a new tab, reload the whole div vs. append to current div
- The usage of different "types" of tags - textarea, search
- Next Steps:
  - Build Authentication System
  - Expand to display other types of file - python, image and etc.
  - Flagging the Tabs
